20252026

:the introduction

coordinated and organized package of courses that The educational program is a includes procedures and experiences organized into course vocabulary. Its main purpose is to build and refine the skills of graduates, making them qualified to is reviewed and evaluated annually meet the requirements of the labor market. It through internal or external audit procedures and programs, such as the external .examiner program

The academic program description provides a brief summary of the program's ills that students are working to acquire main features and courses, indicating the sk based on the academic program's objectives. The importance of this description is evident in that it represents the cornerstone for obtaining program accreditation, supervision of the scientific and it is written by the teaching staff under the .committees in the academic departments

This second edition of the guide includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the hanges in the educational system in Iraq, which included a developments and c description of the academic program in its traditional form (annual, semester system), as well as adopting the generalized academic program description with 2024/25/1 dated 4230 / r TJDaccording to the Department of Studies' lette .adopt the Bologna Process as the basis for their work that programs to regard

In this regard, we cannot but emphasize the importance of writing descriptions g of the educational of academic programs and courses to ensure the smooth runnin .process

:Concepts and terminology

academic program description provides a **Academic Program Description: The** concise summary of its vision, mission, and objectives, including an accurate comes according to specific learning description of the targeted learning out .strategies

This provides a concise summary of the course's key features **:Course description** and expected learning outcomes, demonstrating whether the student has made the It is derived from the program .most of the available learning opportunities .description

An ambitious vision for the future of the academic program to **:Program Vision** .be a sophisticated, inspiring, motivating, realistic and applicable program activities necessary to achieve Briefly outlines the goals and **:Program Mission** .them, and identifies the program's development paths and directions

These are statements that describe what the academic **:Program objectives** program intends to achieve within a specific time period and are measurable and .servableob

All courses/study materials included in the academic **:Curriculum structure** program according to the approved learning system (semester, annual, Bologna

track), whether required (Ministry, University, College and Scientific Department),
number of study units with the n

A consistent set of knowledge, skills, and values acquired by **:Learning outcomes**
the student after the successful completion of the academic program. The learning
program's outcomes for each course must be defined in a way that achieves the pro
objectives

are the strategies used by faculty members to **Teaching and learning strategies**
enhance student teaching and learning; they are plans followed to achieve learning
objectives. In other words, they describe all classroom and extracurricular
activities aimed at achieving the program's learning outcomes
